Sharpies

Right now, we are in desperate need of foster families for puppies and kittens that are coming through the back door. It is normally a 2 – 4 week commitment. We furnish everything you will need to care for them, including all medical needs. Unfortunately, young pets do not have an immune system that is capable of protecting them from all the germs in the shelter. It is the very best way to keep them safe from disease until they are ready for adoption.
